Kelley, I saw that the answer to my second question (about barium post-RO) was already included in your attachment. Sorry. So, all I need is the barium language that was agreed upon for the memos. Thanks.

Hi, Kelley. I'll get started on these now. I'm working from home and don't have access to my archived files, so can you provide me with the following info: 1) the language that should be incorporated for barium and 2) the post-RO result for barium in HW39. Thanks.

Hi again -

I attached a summary of the week #2 sampling locations that have one or more exceedance of a trigger value.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

However, I thought it would be helpful for you.

Ex. 5 - Deliberative

So - it would be great if you would work on any revisions today. Sorry for the pressure.

Please contact me or Rich Fetzer with any questions.

Thanks!
